

Dillon Edward Brady

dillonebrady@gmail.com

My mission is to help clients achieve goals using data-driven strategies. I understand the value of integrating team approaches, and enjoy delivering professional work that is efficient, readable, and reproducible. I specialize in data engineering and DataOps, statistical analysis, business intelligence, SEO/SEM, web design and development. I facilitate data storage and orchestration, roadmapping, and prioritizing frameworks centered on stakeholder and user needs.

Work Experience

MDM/ETL Automation Lead

Remote

08/20-02/26

SpinSys-Diné

- Supported the modernization and automation of existing process and procedures.
- Played a key role in the coordination and support of multiple efforts related to the management and execution delivery of tasks with-in the data layer.
- Led external customer discovery efforts in support of new initiatives related to both data ingestion as well as new business intelligence activities.
- Defined data standards (elements, definitions, structural requirements) for military health repositories.
- Supported formal and informal Data Steward in order to improve data quality and resolve data issues.
- Assisted with design and development of relational database management objects (tables, schemas, indexes, materialized views, partitions, stored procedures, macros, etc.), database design principles, data administration standards, and information security terminology.
- Helped implement best practices and robust ETL solutions, create various ETL jobs based on EDW environment architecture and created data models.
- Interfaced with business and IT team members, with a supporting role in the analysis, research, and resolution of master data issues specific to product recipe and specification.
- Supported the development of business rules and processes to enhance and enforce data quality standards.
- Assisted with procedures for the creation, collection and consumption of the data continuous improvement.
- Identified opportunities to improve data quality, policy, and processes, and ownership.
- Leveraged the data standards and rules to passively and actively manage data quality.

Dillon Edward Brady

dillonebrady@gmail.com

Web Designer and Developer

Charleston, SC

01/15-03/18

Dillon Brady Consulting, LLC

- As a front-end architect, data scientist, and e-commerce specialist, I helped businesses employ data-driven techniques to discover their full potential.
- Developed user interfaces for Universal Music Group, managing database connections and writing scripts to improve use of Spotify's API.
- Designed and developed (and/or managed) interactive websites for South Carolina Cervical Cancer Awareness Initiative, Ridge Media LLC, Naked Pasta, and Vive Media.

Healthcare Consultant

Columbia, SC

07/14-07/15

Kennedy Pharmacy Innovation Center

- Developed a sustainable business model with supporting policy and data analysis for implementing a clinical pharmacist in a Patient-Centered Medical Home (PCMH).
- Measured financial, clinical and population health outcomes.
- In collaboration with Palmetto Primary Care Physicians, I analyzed data within the EHR, applying a validated approach to outcomes evaluation and performance analysis.
- Identified improvement in level of care billing, revenue generation, cost avoidance, productivity, patient satisfaction and quality outcomes: A1c, LDL, BMI, INR, and BP.
- Created dashboards with KPI, resource guides, multiple visual graphics, and presentations to diffuse business model knowledge.

PCMH Project Coordinator Intern

Charleston, SC

01/14-05/14

MUSC Physicians Primary Care

- Worked in collaborative teams to identify the value of the PCMH initiative.
- Prepared documentation to meet NCQA PCMH requirements, designing reporting processes to capture Meaningful Use data for the Diabetes Recognition Program.
- Created training materials for Patient Care Coordinators and was involved in policy writing, research and development, budgeting/accounting, facility planning, architectural design, and patient throughput.

Strategic Planning Intern

Charleston, SC

05/13-08/13

Medical University of South Carolina

- Assimilated data for and authored a 25-page Community Health Needs Assessment, under ACA requirement for 501(c)(3) hospitals.
- Interviewed local healthcare leaders to identify risks to the community, including unhealthy behaviors, limited access to food and primary care, and reported on MUSC initiatives and benefit programs in response to such community needs.
- Assisted Dr. Mark Lyles, CSO, and hospital admin team to adapt to challenges associated with healthcare reform.
- Assisted Decision Support Services in preparing departments for Kronos Workforce Scheduler, and supplied workload acuity system with inpatient nurse staff scheduling.

Ophthalmic Technician

Charleston, SC

11/11-05/12

Retina Consultants of Charleston

- Served as the first point-of-contact for patients receiving medical care.
- Updated patient charts, performed eye exams, applied dilation drops, monitored intraocular pressure, scanned retinal thickness, and sanitized equipment.
- Researched macular diseases and explained treatment options to patients.

Corporate Planning and Strategic Services Intern

Columbia, SC

06/10-08/10

BlueCross BlueShield of South Carolina

- Categorized and indexed news articles on state and federal healthcare reform.
- Created official memo on insurance premium trends, distributed to entire department.
- Performed time studies to monitor the efficiency of software applications.
